## DETAILED ACTION

The applicant's RCE filed on 2/26/2007 was received and the amendment entered.

### ***Response to Remarks***

1. The applicant amended the claims but the amendment did not put the claims in allowable form.
2. The applicant agreed to an examiner's amendment to place the claims in allowable.

### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bruce E. Stuckman (Reg. No. 36,693) on 3/6/2007.

The claims are to be amended as follows:

**Claims 13 and 20: Cancel.**

**Claim 6, line 11:** after "potential", delete "at" and inset in its place - - during - -.

**Claim 11, line 6:** after "potential", delete "at" and inset in its place - - during - -.

**Claim 11, line 7:** after "sequence", insert - - and turning off the clamping when the audio amplifier and the digital-to-analog converter are substantially turned on - -.

**Claim 18, line 13:** after "potential", delete "at" and inset in its place - - during - -.

Claim 18, line 14: after "sequence", insert - - and wherein the clamping switch is turned off when the audio amplifier and the digital-to-analog converter are substantially turned on - -.

Claim 22, line 10: after "potential", delete "at" and inset in its place - - during - -.

Claim 22, line 10: after "sequence", insert - - and wherein the clamping switch is turned off when the audio amplifier and the digital-to-analog converter are substantially turned on - -.

4. Claims 2-6,8-12,14,15,18-19 and 22 are allowed. The following is an examiner's statement of reasons for allowance:

Regarding claims 6,11,18 and 22 prior art Hewitt et al. (U.S. Patent 5,796,851) discloses an apparatus comprising: an audio amplifier (22) to generate an output to a load (20); a digital-to-analog converter (30) to drive the amplifier during at least one of powering up and powering down the amplifier, the digital-to-analog converter to control the amplifier to ramp the voltage at the output at a predetermined rate to reduce rapid voltage changes from being sent to the load during the at least one of powering up or powering down of the audio amplifier (column 3, lines 3-15); a control circuit to generate data sent to the digital-to-analog converter during at least one of powering up and powering down the audio amplifier (DSP, 34) (column 3, lines 3-15). Prior art Kobayashi (US 5,764,005) teaches of clamping the output of the amplifier to selectively clamp the output of the amplifier to a power return potential (column 5, lines 26-30). Prior art Yahagi et al. (US 6,783,073) discloses clipping that is performed using a clamping switch (column 9, lines 32-35. The prior art of combination thereof fails to

disclose or make obvious wherein the clamping switch is on to clamp the output to the return potential during initiation of a power up or down sequence and wherein the clamping switch is off when the audio amplifier and the digital-to-analog converter are substantially turned off. Therefore, the prior art or combination thereof fails to disclose or make obvious an apparatus, a method to power up or down an audio amplifier, an integrated circuit as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
